

Case study

Glazed Extension

When it comes to extending your property most people typically think of a standard extension or a conservatory. Yet, Sarnafil Roof Assured's technical director used a little know-how and expertise to create a stunning glazed extension.

Not only does the extension look good, but it also meets the necessary requirements of the latest Building Regulations thanks to the performance of the roof, which benefits from Sarnafil's flat roofing system and specialist insulation materials. The side lights are glazed with low 'e' glass and the window and door frame is a thermally broken aluminium system.

For the homeowner this new glazed extension provides valuable extra living space with a real sense of style and sympathy to the existing property.

Thanks to this design the kitchen and dining area are now opened up to the world outside.

These glazed extensions can be installed by many Sarnafil Roof Assured installers and will provide a real investment to your property. Look beyond the conservatory to a glazed extension; it's a perfect and striking addition to any home.

This is just one of a number of applications for Sarnafil's flat roofing system in the domestic arena. Sarnafil Roof Assured Registered Installers are involved in extensions, dormers, porches, garages, roof terraces, balconies and in many other home improvement areas.

Project

Installation of a flat roof solution to a glazed extension, Norwich, UK.

Roofing Assured Contractor

Sarnafil applications and technical department.

Description of Works

Design and installation of a flat roof to a new extension. Effective drainage and other key criteria had to be considered in the installation process.

Project Timeline

Extension – 8 weeks
Sarnafil single ply membrane roof – 2 days

Homeowner Comments

"The glazed extension has proved a stunning feature to the back of the property. One of the most important considerations was a low maintenance flat roofing solution, and thanks to Sarnafil we achieved this."

Guaranteed Roofing

Designed for the home you want

Homes & Extensions

Throughout the UK thousands of homeowners have invested in a Sarnafil Roof Assured solution. Extending the life of the roof when compared to other materials.

- Environmentally friendly
- Installed by trained fitters
- Low maintenance

Conservatories

Our products have been used on a wide range of applications over the years including dormer window and conservatory applications. Our experience means that whatever the application, we have a solution.

- Lasting performance
- Proven design
- Aesthetically pleasing

Roof Terraces & Balconies

Our solutions have helped transform many unutilised flat roofs and balconies. Existing flat roofs have been converted into impressive design led roof terraces and even roof top gardens. Make use of your open space.

- Structurally proven
- Weather resistant
- Hard wearing

Dormers & Porches

The entrance to your home is important and that's why you need a product that looks great and performs too, whatever the British weather can throw at it.

- Available in a range of colours
- Can improve thermal efficiency
- Coloured edge trims to improve the finish

Garages

Traditional felt based roofs support moss and bacterial growth and generally have poor appearance. That's why home owners have chosen Sarnafil Roof Assured solutions.

- No longer an eye-sore
- No moss and plant growth
- No problem of bacterial growth
