

Case study

Garages

The purpose of a garage varies widely, we use them to house our vehicles, to store our garden equipment or for general storage. To protect your stored belongings the garage roof needs to keep the elements at bay. By the time the roof has started to fail, it has often started to leak, caused by inadequate materials, neglect and/or poor drainage. Whether your garage is attached to your property or standalone, the roof still needs to perform, whatever the weather.

Sarnafil Roof Assured Registered Installers have experience in transforming poorly performing roofs into ones that can provide total peace of mind. What's more, they look considerably more appealing than traditional roofing materials.

If you are also thinking of a garage conversion, then you'll need to be considering a more energy efficient roof and that means the addition of important insulating materials.

By installing a modern low maintenance Sarnafil roof now, you can prepare for your garage conversion tomorrow. Think of the lifetime value of your garage roof and you'll think of Sarnafil Roof Assured, like thousands of other homeowners who have decided to invest in a low maintenance flat roofing solution from Sarnafil Roof Assured.

This is just one of a number of applications for Sarnafil's flat roofing system aimed at the homeowner, providing lasting solutions that have a BBA certified life expectancy in excess of 40 years. Sarnafil Roof Assured Registered Installers are involved in extensions, dormers, porches, garages, roof terraces, balconies, orangeries and in many other home improvement areas. Our solutions also make a positive impact on the Home Improvement Packs (HIPs).

Project

Installation of a flat roof solution to a garage, Wital, West Midlands, UK.

Roofing Assured Contractor

Company: De Rosa Installations
Contractors: Rob Alexander

Description of Works

Design and installation of an insulated flat roof solution to a garage. The previous roof was in need of on-going maintenance and looked unsightly. Effective drainage was managed in the installation process.

Project Timeline

Strip existing roof – 1 day
Sarnafil single ply membrane roof – 1 day

Homeowner Comments

"It may only look like a garage roof but we can now rest assured that it will require little or no maintenance like the rest of the outside of our house. The contractors were clearly very professional and competent."
